Every year FIFA, the Official Video Game of FIFA, lets gamers play the game as if they are playing the real deal. Every year, millions of fans find their favorite team, sign it up and play online, all the while cheering their team to victory. The FIFA team thought a lot about how to make this year's game even better than ever. We looked at the improvements we were able to deliver on last year, looked at how players are changing, and how much more we can innovate. We improved the core gameplay of the game and challenged ourselves to get better every year. We continue to make great strides in the area of physics, with new animations, improved collisions and impacts to create more fluid and realistic gameplay. We also improved player awareness across the board to enhance the realism of the game for this year's FIFA. Our goal is to create a game that allows fans to be part of the soccer action, whether they play for their favorite club in the stadium or on their couch. New Teams, New Players FIFA is now offering soccer fans an all-new European Leagues for this year's game. For the first time, Brazil, Mexico, Colombia, Belgium and Sweden will join the official European Leagues. And for the first time, Brazil and Mexico have each been added as Leagues. There are now 50 official Leagues in FIFA 22. To further differentiate between the different teams in the game, each team has been granted new player appearances. We've achieved this through PS3® Trophies, which reward players' unique attributes and abilities. Players can score more, dribble farther, and run faster if they have the right challenge. New trophy rewards like the Rapid Increase in Stamina will be featured for good, and all players will need to adapt to the new rules and situations. What's more, FIFA 22 features team-specific kits for 13 countries, each of which will also include all of the apparel the team have available. Working your way up from the bottom to the top, you'll have a lot of players to choose from in this year's game. We've made player appearances more customisable, giving fans even more choices to create their ideal squad. We've also expanded player research and development for all 50 Leagues, and made it easier to edit players than ever before. That way,
